PROFESSIONAL EXPERIENCE

Lead Frontend Developer

KUBITX   August 2018 - Present

I developed the Ui/Ux Exchange wallet using React from scratch, and implemented Api's that could fetch live updates of Cryptocurrencies per time and i did that using Using Next.js.

Fullstack Developer

QUICCOURIER   June 2018 - October 2018(Remote)

I built the tracking system that enables Users/Customers track their goods at anywhere in the the world with very explanatory analytical Dashboard

Junior Backend Developer

MYAGENT.NG   August 2017 - November 2017(Remote)

I developed an Analytical Admin Dasnboard for real estate website that provides the owner of a property the full information and state of his/her property at every given time, with push notications, sms alerts and email notications using OOP php
